

## Intelsius Products Expand to Spain through Inprou

Madrid, Spain – Intelsius, a DGP company, a designer, manufacturer and distributor of temperature-controlled packaging solutions based in York, UK signed a distributor agreement with Inprou. The announcement was made at the Cold Chain Solutions presentation by Inprou and representatives from Intelsius. The agreement extends Intelsius products through Inprou to Spain, Portugal and Andorra.

“We are extremely proud that our exceptionally high performing products are a part of the Inprou initiative in strengthening the quality of the cold chain in the life sciences industry in Spain,” said David Walsh, CEO DGP Intelsius. “The ORCA™ range will benefit the Spanish life science industry in protecting valuable pharmaceutical payloads, which ultimately contributes to ensuring patient safety. Additionally, Intelsius will donate a portion of the proceeds of each unit supplied to our European whale and dolphin charity partner, ORCA,” Walsh said.

The ORCA 2.0 line is a high performance range of solutions that provides up to 170 plus hours of superior thermal protection for high value, temperature sensitive payloads. The entire ORCA 2.0 range is ATMOS™ (Analytical Thermal Modeling Software) enabled allowing quick risk assessment for the suitability of ORCA on routes around the world.

“The ORCA 2.0 range utilizes advanced Plantol™ Phase Change Material (PCM) that allows the ORCA 2.0 solutions extended duration in both extreme hot and cold environments with simple pre-conditioning,” said Victor Camacho, partner, Inprou. “The versatility of panel configurations for this line allows for cost effective, performance for our clients,” Camacho said.

The ongoing global partnership with Marine Conservation organizations aligns the growing global presence of Intelsius with its commitment to environmental stewardship.

### **About Intelsius**

Incorporated in 1998, Intelsius is a subsidiary of DGP Life Science Ltd, headquartered in York, United Kingdom. Intelsius serves a variety of organizations, including government agencies, leading pharmaceutical, biopharmaceutical and clinical research industries to major laboratories. The company offers a variety of solutions to ensure the integrity of customers’ products and samples. Intelsius has a growing global presence with manufacturing facilities, distribution hubs and local offices situated throughout the world, including North America, Europe and Asia.
