

# PHARMACHILL & COLD CELL

COMPONENT  
PACKAGING

**Intelsius produce a range of thermal media tailored to your performance requirements. Our range of PharmaChills are rigid, liquid-filled coolant bottles designed for use with our temperature controlled packaging solutions. PharmaChills feature a non-toxic, water based PCM.**

PharmaChills are rigid bottles containing a non-toxic, water-based PCM ideal for 2-8°C and 15-25°C solutions. They have been specifically designed to be re-usable, and therefore deliver a cost and environmental saving with each re-use.

**Cold Cell provides a light weight, low volume and versatile coolant option for a wide variety of shipments.**

Intelsius Cold Cell is a flexible water based gel pouch coolant. It is supplied flat packed, and dehydrated, making it cost effective to transport and store. When required for use, Intelsius Cold Cell can simply be rehydrated by briefly soaking in water. It is then immediately ready to be frozen and used. Intelsius Cold Cell features several small pockets of gel which allow sheets to be cut up into smaller sections. This versatility allows Cold Cell to be used with a wide variety of payload sizes.
