

INTELSIUS: OUR RESPONSE TO COVID-19

We've been busy supporting COVID-19 testing and vaccine delivery since the pandemic began. With over 20 years' experience in delivering sample transport packaging solutions to a global market, our existing, proven solutions can help you transport samples, pharmaceuticals, and vaccines throughout the COVID-19 pandemic.

COVID-19 SWAB SAMPLE PACKAGING SOLUTIONS

Our PathoPak and Pathoshield products provide complete shipping solutions for UN3373 sample transportation.

COVID-19 SWAB SAMPLE PACKAGING: FLEXIBLE SECONDARIES

Our PathoSeal and PathoPouch products provide 95kPa flexible secondaries which need to be paired with outers to compliantly transport samples for testing and analysis.

COVID-19 VACCINE TEMPERATURE-CONTROLLED PACKAGING

With a portfolio of single use, multi-use, and connected temperature-controlled packaging solutions ranging from 15°C - 25°C to -70°C with dry ice, our temperature-controlled packaging has you covered no matter the vaccine.

COVID-19 VACCINE DELIVERY

SINGLE USE

MULTI USE

CONNECTED

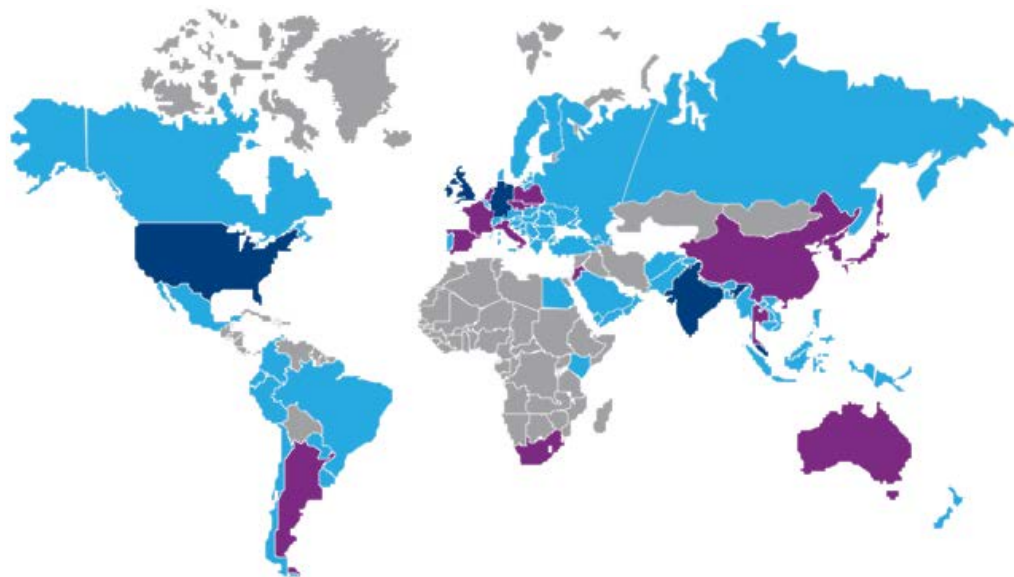

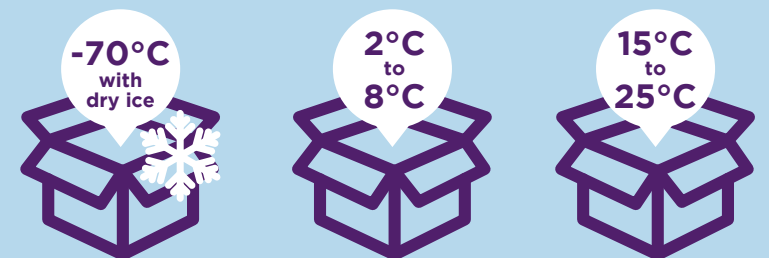

Our ORCA range comprises single use, multi-use, and connected options in order to best meet your specific vaccine delivery needs.

3 Million Solutions

During the pandemic we have supplied over 3 million compliant sample transport solutions for COVID-19 testing.

2 Million Vaccines

Our ORCA temperature-controlled packaging solutions have helped deliver over 2 million COVID-19 vaccines.
