

ORCA MX + SENDUM

A COMPREHENSIVE SOLUTION

The SENDUM PT300 series seamlessly integrates into ORCA MX offering temperature monitoring for sensitive shipments. Users can pre-define dedicated requirements for each shipment, automatically evaluate performance, and conformity upon readout.

The PT300 data-logger is held securely inside the ORCA box. Throughout shipping, data from the logger is automatically transmitted to the portal. From here the temperature data of the payload can be viewed without opening the parcel, maintaining payload integrity.

HOW IT WORKS

The PT300 series logger is securely mounted in the logger compartment of the ORCA MX box

Throughout shipping the logger automatically transmits location and temperature data

Location and temperature data are instantly available to view within the Findum portal

Dedicated and secure space outside of payload but inside packaging for the PT300 series logger

Dedicated and secure space outside of payload but inside packaging for supplies or documents
