

# ORCA RENTAL GUIDE

ORCA  
RENTAL

High-performance ORCA solutions are now available to rent, simplifying your cold chain logistics.

ORCA Rental enables you to reduce your stock holding requirements, provides ready-to-use solutions, and gives you access to temperature-controlled packaging for short periods.

ORCA solutions can be rented as part of the service, with rental periods set at ten days giving you ample time to get your temperature-sensitive payload safely to its final destination.

ORCA temperature-controlled packaging gives users durable, high-performing systems that provide a minimum of 96 hours of temperature protection across various temperature ranges and sizes. Utilising vacuum insulation panels and phase change materials and with all solutions qualified against ISTA 7D, you can maintain performance in the most extreme shipping lanes.

The ordering process is easy and can be completed using the Intelsius online shop. To discuss how rental can work for you, contact [compliance@intelsius.com](mailto:compliance@intelsius.com)

## WHY ORCA RENTAL

ORCA Rental gives you the opportunity to use the very best in temperature-controlled packaging in a way suited to your cold chain processes.

And, at the end of your project, the packaging is returned to us, where it is fully cleaned and refurbished, ready for re-use, keeping raw materials in the supply chain for longer, helping you to meet your carbon reduction targets.

Benefits include

- Access to trusted and qualified temperature-controlled packaging, ready to use when you need it
- Reduce your storage and conditioning costs
- More effectively manage fluctuations in demand
- Flexibility, with packaging adapted for each rental period to suit your payload and shipping lane
- Environmental benefits by eliminating packaging waste from your cold chain

## A SERVICE FLEXIBLE TO YOUR COLD CHAIN REQUIREMENTS

Build the solution best suited to your needs with ORCA Rental.

Simply select options from the below variables to create your perfect solution.

**Temperature:** ORCA rental systems are available in three temperature ranges: 2-8°C, 15-25°C, and -20°C. All solutions provide a minimum of 96 hours of performance within these temperature parameters.

**Size:** ORCA solutions are available in a number of sizes, spanning 1L and 2L ORCA Response solutions, 4L, 11L, 23L, and 50L ORCA Multi-Use Systems, and ORCA Pallet systems up to 345L. For full dimensions and payload volumes please consult the ORCA product sheets, or contact us for further details.

**Pre-Conditioning:** To ensure optimum product performance rental products can be pre-conditioned by our expert Technical Team in our ISTA-certified laboratory. All pre-conditioned solutions are supplied fully assembled and ready to accept your payload on delivery.

**Delivery Legs:** Intelsius can arrange transportation of the solution to an onward shipping address, ensuring your payload gets to its destination safely. Please contact us to discuss second leg delivery options.
