

TEMPSEN

USB DATA LOGGER

DATA
LOGGERS

TempSen's logger range covers both simple and advanced cold chain monitoring needs. The ITAG4 is a compact, single-use USB logger designed for ease of use, offering automatic PDF reports and reliable temperature tracking for routine shipments.

For reusable applications, the Tempod30 delivers greater flexibility with extended battery life, multiple alarm settings, and an LCD display, making it well suited to standard pharmaceutical logistics where repeatability and control are important.

For ultra-low temperature environments, the Tempod90S and Tempod100X provide specialist solutions. The 90S supports dry ice shipments down to -90°C , while the 100X, with its external probe, enables precise monitoring down to -100°C for highly sensitive biologics and cryogenic transport.

Features

- Automatic PDF reporting
- Software-free configuration
- Flexible alarm management
- Wide temperature coverage (including ultra low)
- Compliance and data integrity
